

# WHY 3D LAMINATE?

## No-Drip Edge

Contain spills with Surfacetech's no-drip 3D laminate option. Through a membrane pressing process, the high-pressure 3D laminate forms to pre-routed NO-Drip contours in an MDF substrate. Surfacetech offers a cost-effective alternative to high-priced epoxy-molded table tops as a result. We offer our No-Drip Edge tables in any dimension and with all our 3D laminate color choices.

## Seamless Edge

Surfacetech constructs CARE Casegoods and table tops entirely from high-pressure 3D laminate. Through a membrane pressing process, the high-pressure 3D laminate eliminates the need for T-molding, edge banding, special edge treatments, and, most importantly, visible seams. The seamless properties of 3D laminate result in high durability and ease of cleaning compared to laminate with edge band.
